and 2

10.17.17.17

- 1 2. The method of claim 1 wherein said plurality of data types are selected from error data, warning data, failure data, report data, and time data.

  1 3. The method of claim 1 wherein said plurality of data streams are selected from an
  - 3. The method of claim 1 wherein said plurality of data streams are selected from an error stream, a warning stream, a failure stream, a report stream and a time stream.
  - 4. The method of claim 1 wherein said plurality of devices are selected from a message window, a status window, a report window, a message box, and a file.
- The method of claim 1 wherein said assigning at least one of a plurality data types
  - 2 is done though a software interface presented to a user.
  - 1 6. The method of claim 1 wherein said assigning at least one of a plurality data
  - 2 streams is done though a software interface presented to a user.
  - 1 7. A computer program product comprising a computer usable medium having
  - 2 computer readable code thereon, including program code comprising:
  - instructions for assigning at least one of a plurality of data types to at least one of
  - 4 a plurality of data streams; and
  - 5 instructions for assigning said at least one of a plurality of data streams to at least
  - 6 one of a plurality of devices.

- 1 8. The computer program product of claim 7 wherein said plurality of data types are
- 2 selected from error data, warning data, failure data, report data, and time data.
- 1 9. The computer program product of claim 7 wherein said plurality of data streams
- 2 are selected from an error stream, a warning stream, a failure stream, a report stream and
- 3 a time stream.
- 1 10. The computer program product of claim 7 wherein said plurality of devices are
- 2 selected from a message window, a status window, a report window, a message box, and
- 3 a file.
